

# COLLABORATION AND PERSONAL SUCCESS

It's not about the  
pieces  
but how they work  
*Together*

Collaboration is can be a thing to personal success in many ways. For example if we take a company like apple, the company got success not because of one person but with the help of many workers, managers, CEOs etc. When theres more than 1 person working on thing, there will be more ideas, help etc. Also when you collaborate, you correct each other from doing different mistakes. For example, In the movie series Money Heist, in order to successfully carry out the heist they needed more than 1 person. This is because there will be more ideas and different ways in which the people look at one situation. All this will outwiegh bieng alone to personal success.
